[Prince Thomas], 1687-1758.

(Sibley, V, 341-368.)

The Vade Mecum for America.

**Boston, Kneeland and Green for Henchman and Hancock,
1731. [2], iv, [2], 220 pp.**

AAS copy.

THE
Vade Mecum
FOR
AMERICA:
Or a Companion
FOR
Traders and Travellers:

CONTAINING

- I. An exact and useful Table, shewing the *Value* of any *Quantity* of any *Commodity*, ready cast up, from *One Yard or Pound to Ten Thousand*.
- II. A Table of Simple and Compound *Interest*.
- III. The Names of the Towns, and Counties in the several Provinces and Colonies of *New-England*, *New-York*, and the *Jerseys*; as also the several Counties in *Perssylvania*, *Maryland* and *Virginia*: Together with the Time of the Setting of their Courts.
- IV. The Time of the General Meetings of the Baptists and Quakers
- V. A Description of the Principal Roads from the Mouth of *Kennebeck-River* to the North-East of *New-England*, to *Jamez-River* in *Virginia*.
- VI. A correct Table of the Kings and Queens of England, from *Egbert* the 1st King of England to His Present Majesty King **GEORGE II.**

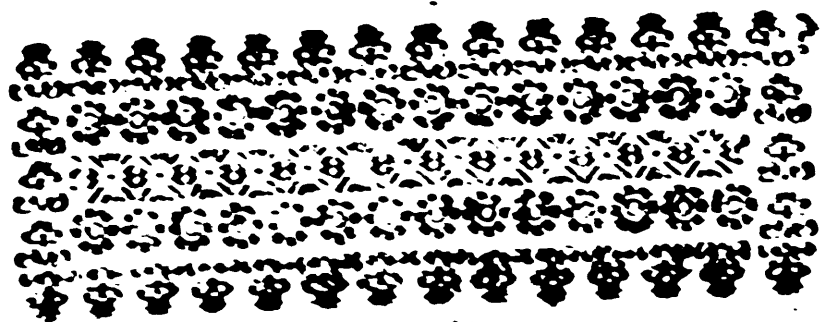

Together with several other Instructions, and Tables in *Arithmetick*, *Geography*, &c.

To which is added,

The Names of the Streets in **Boston**.

Collected & Composed with great Care & Accuracy.

BOSTON, N. E. Printed by S. Kneeland and T. Green, for D. Henchman at the Corner Shop the South side of the Town-House, & T. Hazrook, at the Bible and Three Crowns in Ann-street. M DCC XXXI.

THE
PUBLISHER
TO THE
READER.

THE great Usefulness of such a Compo-
T sure among the
British Provinces in
AMERICA will
sufficiently appear by the Ge-
neral Heads exhibited in the
Title Page. It is a Work that
has been long desired, is in-
deed the first of its kind, cal-
culated for their General Ser-
vice, and we cannot doubt will
be entertain'd with surpris-
Welcome.

A 2

THE first of the Tables being the most expeditious Method of Transacting Business of Trade, by knowing with the Cast of an Eye, the Value of any Quantity of any Commodity; is evidently of such great Advantage, that we need not speak a word in its Commendation.

THE Table of Interest is of too great Use, to be omitted: and of several sorts of those extant, we have chosen that which seem'd to us to be the plainest and most exact.

THE Method of using both these Tables being laid down in the Book itself, we shall only observe; that the Figures are much more neat and beautiful than those in the like Tables Published in Great Britain; and we have been at considerable Expence to have them carefully corrected at the Press.

In the Names of the Counties and Quarts we have gone as far on the Continent as Virginia: and should with Measure have Proceeded to South-Carolina, if we

we cou'd have gotten due Intelligence.

THE Times of the General Meetings of the Baptists and Quakers, we have Published, not only to oblige those Particular Denominations; but also for the Information of others, to whom the Ex-monition of those Conventions may be of some Advantage.

THE Description of the chief Roads is of General Use to Travellers. And as we have taken care to get as accurate Accounts as possible from those who are best acquainted with them; so we have here oblig'd the Publick with Draughts of some new Roads, which have never been Described from the Press, as well as former Roads of late exactly measured.

In the Tables of the Kings and Queens already Published in a vast Variety of Books and Pamphlets, we have observed several differing Dates, whereof some must needs be Erroneous. In this we have drawn, we therefore tho't it best, to follow

follow Monsieur Rapin's Tables, in his celebrated *History of ENGLAND*, translated lately into our Language, and Printed the last Year in London. The very mention of whose Name and History will be sufficient to Recommend the List.

THE other Tables in *Arithmetick* and *Geography*, we tho't would be of too great Use and Entertainment to many, to be omitted.

HOPING therefore we have, in this Composure, done a very acceptable Service to the *American Plantations*; we conclude with wishing them the Advantage of it, and with the Flourishing of Liberty and Commerce, universal Charity, good Neighbourhood, and every other Virtue that by the Divine Blessing tends to make them prosperous and happy.

Boston, Dec. 1st.

1731.

The **BRITISH Colonies and Provinces** on the Shoars of **NORTH-AMERICA**, as they lie in Order from *North East* to *South West*, above 1500 Miles on the Sea, with their **CAPITALS** and *Principal Sea-Ports*, and their *Longitudes* and *Latitudes*.

- N.B. 1. Their **LONGITUDES** are taken *West* from *London*: as their **LATITUDES**, are *North* from the *Equinoctial*.
2. Those mark'd with a * are taken out of the *Mariners Compass Rectified*: The Rest from Mr. *Moll's Maps*.
3. Their *Capital Towns* are Printed in **CAPITALS**: the Rest are only *Sea-Ports*.

The Use of the foregoing Table.

THE Table foregoing is so plain, that it needs no Explanation, the Epistle to the Reader shews what is needful relating thereto, and some Examples of its Use take as follow, viz.

Example 1.] Admit you would know what 47 Pounds, Ells, Yards or Ounces, &c. of any Commodity amounts to, at 7 s. 9 d. the Pound, Ell, &c. Look first for the Price of the Thing proposed, as here 7 s. 9 d. at the Top of the Table, then cast your Eye downward, and under the Words [Value of] you will find 47, right against which, toward the Right Hand, you will find 18 l. 4 s. 3 d. and so much is the true Value of 47 Pounds, Ells, Yards, &c. of any Thing at 7 s. 9 d. per Pound, Ell, Yard, &c.

Example 2.] Admit you would know the Value of some Number of Pounds, Ells, or any other Thing, which cannot be found at once in the Table: As suppose you would know what 751 Ells of Linnen, &c. amount to at 7 s. 9 d. per Ell; the Rule is, having found (as before) the Price of the Ell at the Top of the Table, you will find under [Value of] 700, right against which toward the Right Hand you have the Value of 700 Ells,

	l.	s.	d.
which is =	271	5	0
And against 51 in that			
Column under 7 s. 9 d. is	19	15	3
So that the Value of			
751 at 7 s. 9 d. each is	291	0	3

Example 3.] Admit the Value of the Unit of your Commodity or Merchandize is not just expressed in the Table (though I think there's scarce any thing bought and sold whose Value is not therein); as suppose you would know the Value of 56 Yards of Broad Cloth, at 12 s. 5 d. the Yard: Look for

The Use of the foregoing Table. 157

for 12 s. the Price of the Pound, Ell, Yard, Ounce, or other Thing,

	l.	s.	d.
and against 56 you have =	33	12	0
And under 5 d. and against			
56 you have	1	3	4
The Sum of which for An-			
swer is	34	15	4

Example 4.] Admit you would find the Value of 7 C. 3 q. 25 lb. of any Commodity at any rate, as suppose at 7 s. 9 d. per Pound, here you will find the Value of 1 Hundred, viz.

	l.	s.	d.
112 lb. at 7 s. 9 d. to be =	43	8	0
Which multiply by			
	7		

And the Product is	303	16	0
The Value of 3 q. (or 84 lb.)			
at 7 s. 9 d. is	32	11	0
And the Value of the 25 lb.			
is (at that rate)	9	13	

The Sum for Answer is — 346 0 9

Example 5.] The farther Use of this Table is to find the Value of the Hundred weight of any Thing, by knowing the Price of the Pound. Thus, if the Price of a Pound Weight is 7 s. 9 d. that of the Hundred (against 112 lb. and under 7 s. 9 d.) will be found 43 l. 8 s. and so of any other. Or where the Value of the Pound is low (as 6 d. or less) the Value of the Hundred may be found by Memory, by this short Verse.

*As many Farthings as will buy a Pound,
So oft in th' Hundred Weight is Two and
four Pence found.*

Thus if the Value of the Pound is 3 d. farthing, that is 13 Farthings, that of the Hundred is 13 two Shillings and 13 Groats, which is 30 s. 4 d. the Hundred; and the Reason of this is, because 112 Farthings is 2 s. 4 d.

Example 6.] By the foregoing Table you may likewise find the Value of the Pound

158 The Use of the foregoing Table.

Pound (to a Farthing) by knowing the Value of the Hundred Weight: Thus, if the Value of the Hundred is 16 s. 4 d. Look for 16 s. 4 d. (or a Number next thereto) against 112 included thus in a Crotchet [112] and casting your Eye to the Top of that Column, you will find the Price of the Pound, &c. to be one Penny three Farthings.

Example 7.] The farther Use of this Table is to find how much of any Commodity at a rate proposed any Sum of Money will buy. Thus, if you would know how many Yards of Muslin of 6 s. 3 d. per Yard 25 l. will purchase: Look at the Top of the Table for 6 s. 3 d. and under that rate look for 25 l. in the Column of Pounds, Shillings and Pence, and you have 80 in the Column toward the Left Hand under [Value of], and so many Yards will the 25 l. buy.

Example 8.] Or if you desire to know what any Sum will buy that is not just mentioned in the Table; as suppose you would know how many Ells of Holland of 6 s. 3 d. per Ell 100 Pounds will buy: Look under 6 s. 3 d. for 100, as you did before for 25 l. and you will find against 93 l. 15 s. (which is the next Number less than the 100 l.) 300; then deduct 93 l. 15 s. from 100, and the Remainder is 6 l. 5 s. against which (or the Number next less) you will find in the Table under the rate 6 s. 3 d. afore-said, 20; so that 100 l. I find will buy Ells 320, at 6 s. 3 d. each, and thus may you find any l. s. Ells. other to Half or 93 15 will buy 300 a Quarter of a 6 5 — 20 Unit thereof: — — — See the Margent. 100 0 = 320

This Table reduceth any Number of Shillings, Pence or Farthings into Pounds, which is very useful to all Persons, especially such as understand not Division.

Example 9.] To reduce Farthings into Pounds.

The Use of the foregoing Table. 159

In 75643 Farthings, how many Pounds Sterling? Under 1 Farthing, l. s. d. against 70000 is — 72 18 4
5000 — 5 4 2
600 — 0 12 6
43 — 0 0 10 1/4
75643 = 78 15 10 1/4

Example 10.] To reduce Pence into Pounds.

In 31839 Pence, how many Pounds? Under 1 d. against 30000 is 125 0 0
1000 — 4 3 4
800 — 3 6 8
39 — 0 3 3
Ans. 31839 = l. 132 13 3

Example 11.] To reduce Shillings into Pounds.

Look for your Number of Shillings, given to be reduced, under the Price [One Shilling] and right against the Shillings given, you have the Answer in Pounds, as before. This needs no Example.

Example 12.] From what hath been shewed hitherto, this Table will be found very useful for the speedy working Questions in Barter: As if a Merchant hath Cotton Wool, 8 C. 3 q. 27 lb. at 13 1/4 d. per Pound, which he is willing to Barter with a Linnen Draper for Fustians, viz. Dyed Jeans at 14 s. each End, white Jeans of 16 s. per End, and Barmillians at 18 s. per End; How many Ends of Fustians must the Draper give the Merchant for his Cotton Wool? Answer, 24 Ends of each sort, and 1 s. 10 1/2 in Money. See the Work.

At 13 1/4 the Pound 1 C. (or 112 lb.)

l. s. d.
is worth = 6 8 4 1/8 } Multiply

The Value of 8 C. is 51 6 8
3 Quarters 4 16 3
27 lb. is 1 10 11 1/2

So the Cotton Wool is worth } 57 13 10 1/2

160 *The Use of the foregoing Table.*

Now if the several Prices of the Fustians is added together, the Sum is 48 s.; $\frac{1}{4}$ of which is 16 s.: under which Price, and against 57 l. 12 s. (which is the next Number to 57 l. 13 s. 10 $\frac{1}{2}$ d.) you have 72, $\frac{1}{4}$ of which is 24, which shews that the Draper must give the Merchant 24 Ends of each Sort of Fustians for his Cotton Wool.

Example 13.] This Table is also useful in working Questions in Loss and Gain: As if a Merchant buyeth 849 Bundles of Yarn at 6 s. 9 d. per Bundle, and sells the same again at 9 s. 6 d. per Bundle, what does he gain thereby?

The Difference in the Prices is 2 s. 9 d. and 849 times Two Shillings and nine Pence, by the Table, is 116 l. 14 s. 9 d. for Answer.

	l.	s.	d.
For 800 under 2 s. 9 d. is	110	0	0
49 ————— is	6	14	9
<u> </u>			

The Sum 849 Answer = 116 14 9

Example 14.] When the Price of the Unit of any Commodity is any Sum above 1 l. and under 2 l. the Value is found by the Table; thus, if you would find the Value of 84 dyed Jeans, &c. at 34 s. 6 d. per End:

	l.	s.	d.
For the 1 l. put down —	84	0	0
Then look for 14 s. 6 d. at			
the Top of the Table, and	60	18	0
against 84 you will find			
<u> </u>			

The Sum of which is the } 144 18 0
Answer —————

A TABLE

O F

Simple and Compound

INTEREST,

Containing the

SIMPLE INTEREST

AND

DISCOUNT

O F

Any SUM from 1 s. to a
1000 l. for any Number
of Days, Months or Years.

Interest of MONEY.

1. **I** NTEREST of Money is the Sum payable by the Borrower to the Lender for the Use thereof, and is sometimes called *Use*, sometimes *Interest* of Money. It is called *Use* or *Usury*, because it is paid by the Borrower for his using the same. And it is called *Interest*, as it respects the Lender, because it is the Money due to him for his Interest therein, or Property thereto: So that,

2. The Money lent is called *Principal*, the Money paid for the Use is called *Interest*, which when only paid for the Use of the Sum originally lent, is called *Simple Interest*. But when that is not paid when due, but becomes Principal Money, the Use of those two together, viz. the first Principal Money lent, and the Interest due thereupon, is called *Compound Interest*.

3. The Person to whom Money is due from another is sometimes called *Creditor*, sometimes *Usurer*, sometimes *Mortgagee*. And the Person owing such Money is called, with respect to the Lender, a *Debtor* or *Mortgager*.

4. One Man is commonly said to be Debtor to another, when he is any ways indebted, whether upon account of Trade or of borrowing Money without Security of Land, &c. And he is *Creditor* that gives such Person Credit.

5. When one Man lends another Money, and requires a Land Security for the Payment thereof, in this Case he that makes over his Land as a Security, is called the *Mortgager*; and he to whom the same is made over, is called the *Mortgagee*. But when any Moveable is delivered as a Security to the Lender, it is commonly called a *Pawn* or *Pledge*, and they that lend Money upon such Security are called *Pawn-Brokers*.

6. The Sum paid for the Use of 100 *l.* for 1 Year is called the *Rate of Interest*.

Simple Interest at 6 per Cent.

*Reduction of Weights, Measures, and Coins.***I. WEIGHTS.**

Troy Weight.			Grains.
Charact.			20
P. W.		15	24
Ounces.	20	24	480
Pounds.	12	240	288
			5760

By Troy Weight is weighed Gold, Silver, Jewels, Amber, Electuaries, Bread, Corn, and Liquors; and from this Weight all Measures for wet and dry Commodities are taken.

The Pound Troy is in Proportion to the Pound Averdupois as 17 to 14, and the Ounce as 51 to 56, and consequently 11 Ounces Troy are equal to 12 Ounces Averdupois, and 140z. 13dw. 9gr. make a Pound Averdupois.

Apothecaries Weight.			Grains.
Scruples.			20
Drams	3		60
Ounces	8	24	480
Pounds	12	96	288
			5760

Apothecaries in making up their Medicines use this Weight, but they buy and sell their Drugs by the Averdupois.

Averdupois Weight.			Drams.
Ounces			16
Pounds	16		256
Quarters	28	448	7168
Hundreds	4	112	1792
Tun	20	80	2240
			35840
			573440

By Averdupois Weight, is weighed all manner of things that have waste, as all Physical Drugs and Groceries, Resin, Wax, Pitch, Tar, Tallow, Soap, Hemp, Flax, &c. All

All Base Metals and Mineral, as Iron, Steel, Lead, Tin, Copper, Allum, Copperas, &c. The Tun Averdupois is 20 Hundred of all Things, except Lead, which has but 19 Hundred and a half to the Tun or Fodder. The Hundred Weight Averdupois contains 112 Pound, the half Hundred 56 Pound, the Quarter 28 Pound, the Stone (or half Quarter of the Hundred) 14 Pound; and thus is Iron and Shot weighed; but Allum, Cinnamon, Nutmegs, Pepper and Sugar, have but 13 Pound and an half to the Stone, or half Quarter of the Hundred; 27 Pound to the Quarter, 54 Pound to the Half, and 108 Pound to the whole Hundred. Wool is sold by the Clove allowing but 7 Pound to the Clove, 14 Pound to the Stone, 28 Pound to the Tod, 182 Pound to the Wey, 364 Pound to the Sack, and 4368 Pound to the Last. A Faggot of Steel is 120 Pound. A Burthen of Gad Steel is 9 Score or 180 Pound. 56 Pound of Butter, or 60 Pound of Soap, make a Firkin, and 2 Firkins of either make a Barrel. Butchers allow but 8 Pound to the Stone.

pure Silver without any Alloy, is worth 3 l. 4s. 6d. and an Ounce 5s. 4d. 2 f. But with Alloy the Pound is worth no more than 3 l. and the Ounce 5s.

The Standard for Gold is in the Pound Troy 11 Ounces of fine Gold, and 1 Ounce of Alloy.

Our Gold is of equal fineness with the *Spanish*, *French* and *Flemish*; but our Silver Coin has less of Alloy in it than either *French* or *Dutch*.

Fineness of Gold is esteemed by the Caract, which is no certain weight, but the Twenty fourth part of any Quantity, and is divided into Grains and Parts; as the Twenty fourth part of the Pound Troy, and then 2 Penny Weight 12 Grains Troy make a Caract Grain, and four of such Caract Grains make a Caract, and 24 Caracts make a Pound Troy, or the Twenty fourth part of an Ounce Troy; and then five Troy Grains make one Caract Grain, and four Caract Grains make one Caract, and 24 Caracts make one Ounce Troy. The Caract which weighs Jewels is divided into 4 Grains, of which 20 make a Penny Weight Troy.

THE END.
